

NAPA COUNTY CERT ACTIVATION LEVEL'S

ALERT

This level requires no immediate response action by CERT volunteers. This is an advisory that CERT team leaders have been notified of an emergency management activity which may require CERT assistance. The team leader will give a "heads-up" notice via text message or voice-call and determine the status of all volunteers as "available" or "unavailable". This information will be forwarded to the Napa County OES contact or notifying official as soon as possible.

PREPARE

CERT team leaders and volunteers are to prepare for possible deployment within 12 to 24 hours and should remain on standby until notified of an assignment. Upon prepare notification, CERT leaders will contact their volunteers via text message, voice-call or other means to advise them of the pending situation and determine their availability and status. Team leader will report the status of their team members (who are ready to respond) to the Napa County OES or notifying official as soon as possible. Personal equipment and supplies, vehicles and kits of food, water and clothing should be checked, assembled and packed for deployment.

DEPLOY

Deployment is authorized for CERT volunteers to proceed without delay to their normal rally point or other area as designated by the Napa County EOS or the team leader. The team leader will notify all CERT volunteers to deploy and provide a status report of member's availability back to the appropriate contact or notifying official as soon as possible. Once the team is operational and on-scene, the Berryessa team leader (IC) will notify the appropriate contact or notifying official with an updated status and await further instructions.
